

RGL4 Extension strap

RGL4

Accredited To: EN354

Web Material:25mm Polyester 40Kn

Fittings:Any Compatible EN362 Karabiners

Weight:0.16kg

Features: Sewn Loop Eye on Free End

The RGL4 is supplied in a 450mm length and is normally used as an extension strop fitted to the rear dee ring of a full body harness. When used in this manner, it allows an operative to self-connect to a fall arrest block (RGA1-8) by extending the attachment point on the harness, and bringing it into the field of vision.

We use 25mm 40 KN webbing in the manufacture of this product which provides greater strength, wear and shear resistance compared to other webbing.

It is also treated with a water repellent coating which should extend the life of this product.

(For details of daily inspection procedures, see the info sheet)
