Web Material: 45mm water repellent polyester.

Fittings: High tensile steel alloy

Weight: 1.7kgs

Features: Front & rear attachment points,
Sit support strap
Leg support pads
Waist strap
Quick click fittings on leg and waist straps

The RGH12 has been developed in conjunction with the fire service. The speed and simplicity of assembly and adjustment makes this harness the ideal solution where rapid and simplistic donning is crucial.

The waist and leg straps comprise 'quick click' snap to buckles, which cannot be incorrectly assembled, and pulling down on the webbing tails easily tightens the front shoulder and chest straps.

The additional waist strap and extra wide sit strap, provide added support and comfort during use and also whilst in suspension. Pressure is also eased from the legs with the presence of leg pads.

The harness comprises front and rear D rings for the purpose of fall arrest, and provides the perfect solution where speed and extra comfort is preferred. To be used with compatible equipment from the rest of the Ridgegear range.

The RGH12 is fully adjustable and can be quickly and easily adjusted to fit the wearer.
