

## RGL6 Elasticated Fall Arrest Lanyard

RGL6

**Accredited To:** En354 & EN355

**Web Material:**25mm Polyester 40Kn

**Fittings:**Any Compatible EN362 Karabiners

**Weight:**0.15kg

**Features** Fitted with shock absorber pack

Very popular on the European mainland, the RGL6 is supplied in two lengths measured at full expansion: **1.3 M**  
**1.8 M**

A general-purpose lanyard used when the operative is working from a static position connected to a fixed anchor point. If movement between anchorages is required, a twin leg lanyard should be used (RGL3 or RGL9) to provide constant protection.

The elasticsation in the lanyard reduces the amount of hanging slack in the lanyard, which can be helpful when working in tight spaces to help reduce trip hazards and entanglement.

This product can be fitted with any EN362 Compatible Karabiner.

*(For details of daily inspection procedures, see the info sheet)*
