

RGH4 4 Point Harness

Accredited to: EN 361 & EN341

Web Material: 45mm Water repellent polyester

Fittings: High Tensile Steel Alloy

Weight: 1.75kgs

Features: Front, rear & side attachment points, rip stitch indicators, gear loops.

The RGH4 includes all of the features of the RGH1-3 harnesses, (see data sheets). This comfortable harness is designed for operatives who spend a lot of time working at height and in exposed areas. The RGH4 is a “multi task” harness and will allow operatives to access almost any area in safety using a combination of the RidgeGear products available. As with the RGH2, this harness is suitable for use in performing rescues from height using the RGR4 rope rescue kit.

As with the RGA3, the wide belt fitted to the RGH4 is comfortable and provides lumbar support to the operative. The belt is also fitted with three gear loops for carrying tools leaving the hands free thus maintaining the required three points of contact when climbing. All of the features, combined with a good load bearing capacity, make this harness the ideal choice for the professional.

The harness is fully adjustable and is fitted with rip stitch indicators. The ring connection between the chest & the shoulder straps, ensure no stress loading when force is applied the front dee ring.

(For details of daily inspection procedures, see the info sheet)
