

## RGL5 Restraint Lanyard

**Accredited To:** En354

**Web Material:**25mm Polyester 40Kn

**Fittings:**Any Compatible EN362 Karabiners

**Weight:**0.15kg

***Restraint Only***

**RGL5**

The RGL5 is a restraint lanyard, and is supplied in any length up to 2 mtrs to act as a leash for an operative working at height to prevent possibility of risk of a fall.

It is important to understand the principles of “fall restraint” as the RGL5 can only be used for **Fall Restraint**, as there is no shock absorption built into the system. If there is **any** possibility of an operative falling, a **Fall Arrest** product **must** be used. We use 25mm 40KN webbing in the manufacture of this product which provides greater strength, wear resistance compared to other webbing. It is also treated with a water repellent coating which should extend the life of this product.

The RGL5 should never be used to extend another fall arrest product.

***(For details of daily inspection procedures, see the info sheet)***
