**Web Material:**27mm 40KN Polyester Web

**Fittings:**Steel Adjuster

**Weight:** 0.15 kgs

**Features:** Adjustable **Restraint only** Lanyard

RGL12

The RGL12 is an adjustable restraint lanyard, and various lengths are available to act as a leash for an operative working at height. The adjustability of the product ensures that the correct length can be selected for the task in hand.

It is important to understand the principles of “fall restraint” as the RGL12 can only be used for **Fall Restraint**, as there is no shock absorption built into the system.

If there is any possibility of an operative stepping / falling over an exposed edge, or falling through a fragile surface, a Fall Arrest product should be used.

The 40kN webbing used in the manufacture provides greater strength compared to other webbing and systems.

The RGL12 should never be used to extend another fall arrest product.

This lanyard can be fitted with any compatible EN362 Karabiner

**(For details of daily inspection procedures, see the info sheet)**
